AVA AUTOMATIC SLIDING STEP

The automatic electric step can be operated by a door contact switch, or a driver operated switch. The design is aluminium non-slip with plastic corners and rubber front edge gives a modern appearance fitting well with the design of today's vehicles. The step has a complete different construction compared to other products on the market. The new closed sliding mechanism is built to keep dirt far away from the critical parts. It comes with Yellow LED lights and a buzzer incorporated into the step.
